Certificate of Compliance

Certificate Number:

E493748

Report Reference:

E493748-20170817

Issue Date:

2024-02-23

Issued to:

**QuickBOLT a Division of Quickscrews International Corp
5830 Las Positas Rd
Livermore CA, 94551 United States**

This certificate confirms that representative samples of:

MOUNTING SYSTEMS, MOUNTING DEVICES, CLAMPING DEVICES AND GROUND LUGS FOR USE WITH PHOTOVOLTAIC MODULES AND PANELS - COMPONENT

See Addendum Page for Product Designation(s).

Have been evaluated by UL in accordance with the component requirements in the Standard(s) indicated on this Certificate. UL Recognized components are incomplete in certain constructional features or restricted in performance capabilities and are intended for installation in complete equipment submitted for investigation to UL LLC.

UL 2703, Mounting systems, mounting devices, clamping/retention devices, and ground lugs for use with flat-plate photovoltaic modules and panels

Additional Information:

See UL Product iQ[®] at <https://iq.ulprospector.com> for additional information.

This Certificate of Compliance indicates that representative samples of the product described in the certification report have met the requirements for UL certification. It does not provide authorization to apply the UL Recognized Component Mark. Only the Authorization Page that references the Follow-Up Services Procedure for ongoing surveillance provides authorization to apply the UL Mark.

Only those products bearing the UL Recognized Component Mark should be considered as being UL Certified and covered under UL's Follow-Up Services.

Look for the UL Recognized Component Mark on the product.

David Piecuch
UL Mark Certification Program Manager

CERTIFICATE OF COMPLIANCE

Certificate number E493748
Report reference E493748-20170817
Date 2024-02-23

This is to certify that representative samples of the product as specified on this certificate were tested according to the current UL requirements.

INSTALL INSTRUCTIONS

RECOMMENDED MATERIALS

- 3/8" socket or nut setter (For 1/4 x 3/4" Screw)
- 1/2" socket or wrench (For M8 Flange Nut)

INSTALLATION INSTRUCTIONS

1. The RibRider's™ width is adjustable. Loosen center nut to adjust width.
2. For bottom rail mounting, rotate the L-Foot flat side up. By default, the L-Foot is flat side down for side rail mounting.
3. Remove protective paper from Butyl.
4. Place mounting arms Butyl side down on rib in marked location.
5. Fasten mount to rib using included screws. To prevent stripping use low torque.
6. Fasten center nut and check angle of L-Foot.

* Do not predrill

* Torque values should not exceed 20 PSI. Screws will drive in with little or no pressure required. Too much pressure could cause spinout.

BUILDING CODE LETTER

March 22nd, 2023

To whom this may concern,

QuickBOLT is committed to excellence. The parts tested are durable goods, meaning the material composition and detailed specifications of the parts do not change. Therefore, all stamps are current. Any part tested will have the same results no matter what year the tests are performed. All testing and reports are current and valid with 2022 CBC standards.

SolarRoofHook is the previous name of QuickBOLT. Any test result referencing SolarRoofHook is referring to a QuickBOLT product.

All our parts were tested by a third-party test facility, in possession of a current engineering license for the state where the tests were performed for the following.

1. Uplift test
2. Downward load test
3. Lateral Test – Asphalt Mounts, and Metal Mounts only
4. ASTM E2440 and ASTM E330 Waterproof Tests - QuickBOLT only

The following is an excerpt from:

CALIFORNIA BOARD FOR PROFESSIONAL ENGINEERS AND LAND SURVEYORS
guide to Engineering & Land Surveying for City and County Officials
Page 12, Line 27

27. If the license has expired between the time the engineering documents were prepared and the time when the local agency's review is performed, do the documents need to be re-sealed by a licensee with a current license? (B&P Code §§ 6733, 6735, 6735.3, 6735.4)

As long as the license was current at the time the engineering documents were prepared, the documents do not need to be re-sealed prior to review by the local agency. However, any changes (updates or modifications) to the documents that are made following the review by the local agency would have to be prepared by a licensed engineer with a current license and those changes would have to be signed and sealed.

We trust the information provided will resolve any request for the test reports submitted to have a stamp from the current year.

Regards,

Rick Gentry
Executive Vice President

ENGINEERING REPORT

8148 NW 74 Avenue
Medley, FL, 33166
305.885.3328 ph. | 305.885.3329 fx

CLIENT: Quickscrews International Corporation
5830 Las Positas Road
Livermore, CA 94551

Project No: MED-2090a	Report Date: August 6, 2024
-----------------------	-----------------------------

SAMPLE ID: Series: QB RibRider™

SAMPLE DESCRIPTION: See page 3 for full description.

SAMPLING DETAIL: The test sample manufactured by Quickscrews International Corporation was submitted directly to QAI by the client. Samples were not independently selected for testing.

DATE OF RECEIPT: Samples were received at the QAI Miami Laboratories on May 15, 2024, and June 18, 2024.

TESTING PERIOD: June 26, 2024.

TESTING LOCATION: QAI Laboratories – Miami, Florida, USA

AUTHORIZATION: Proposal Number 24AM02151R1 dated April 29, 2024, signed by Richard Gentry, Vice President of Product Dev. for Quickscrews International Corporation, dated April 29, 2024.

TEST PROCEDURE: Testing to the following requirements:

- ASTM D7147-12 Standard Specifications for Testing and Establishing Allowable Loads of Joist Hangers

TEST RESULTS: The QB RibRider™ achieved the results noted below when tested in accordance with ASTM D7147 for lateral and tensile loads.

Lateral Load with L-foot down	716 lbf
Lateral Load with L-foot up	410 lbf
Tensile Load	1510 lbf

CONTENTS: Test report pages 1 through 7.

Model Designation:	Series: QB RibRider™

MATERIAL CHARACTERISTICS		
Members	Material	Part Number
RibRider Adjustable Solar Mount 90/180 Combo 75mm Butyl Base 32/Case	304 Stainless Steel	17766
RibRider Adjustable Solar Mount 90/180 Combo 75mm Butyl Base 1/Case	304 Stainless Steel	17767

Test Procedure for Lateral Load (with L-Foot in the down direction)
 Four samples were tested using a calibrated Instron Testing Machine. A vertical compressive load was applied to the L-Foot at a constant rate of 0.12 inch per minute until the specimen could not support any future loading. The mounting arms were attached to 24-gauge metal using a butyl tape and (4) 14 x 1 1/2" hex washer head self-drilling screws.
