

QuickPATCH™

PATENT PENDING

Seals Roof Holes Quick

A quick, leak-proof solution for roof repairs.

Problem

Rafter misses, safety anchors, and the removal of rooftop satellite dishes often lead to leaks, causing lower installer ratings and costly callbacks. QuickPATCH™ provides a fast and reliable solution to seal these problematic holes. Designed with durable galvanized steel and a butyl pad, it ensures every hole is sealed right the first time, delivering long-lasting protection. Easy to install yet engineered for decades of durability, QuickPATCH™ helps installers complete jobs quickly, confidently, and with peace of mind.

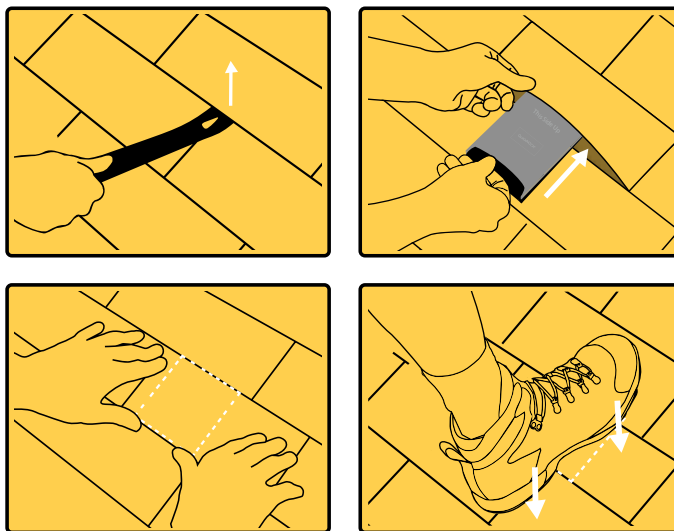

Solution

A simple peel, place, and press of the 4x5-inch galvanized steel QuickPATCH™, combined with its 2mm adhesive butyl pad, seals holes and prevents leaks. It also features a top butyl strip to reseal the shingle course. QuickPATCH™ offers a fast, easy, and reliable solution for patching roof holes, ensuring long-lasting protection and peace of mind.

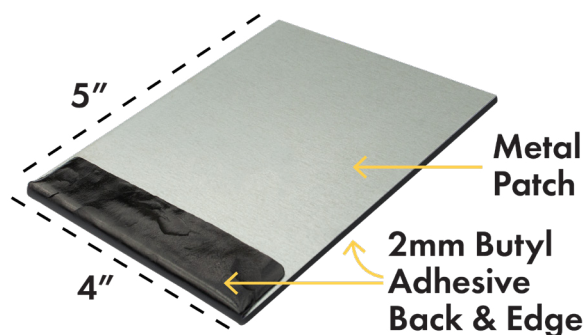

A simple peel, place and press of the QuickPATCH™ seals roof leaks caused by wear & tear, weather, solar, or HVAC with reliable, long-lasting leak protection.

Features

- Easy to Apply
- Made of Steel
- Long Term Reliable Fix
- Reduces Callbacks
